PRODUCT ANNOUNCEMENT 1800 SERIES F-PIN OPTION

July 31, 2008

Due to circumstances beyond our control, EECO Switch is no longer able to offer our “standard” F-Pin option on the 1800 Series product line. This option was based on a pin extending .160 inches off the back edge of switch printed circuit board, allowing the user to attach a motherboard or other accessory. We are now limited to offering this option with a pin which extends .285 inches off the edge of the PCB. This was previously referred to as the “Long F-Pin Option” in our literature. The long F-Pin will now be the standard length, and will be the only pin option available on the 1800 Series switch product line.

Please contact the factory if additional assistance is required.

“F” OPTION PINS
